

# VOC SYMPOSIUM

Vereniging Openbaar vervoer Centrumgemeenten

## INVITATION VOC-Symposium Sustainable public transport

October 5  
12 AM – 6 PM  
IPKW, Arnhem

**Can local governments play a role in the sustainable public transport? Yes! The VOC, the Dutch association of public transport center municipalities, is therefore dedicating a symposium on this subject, organized jointly by the Clean Mobility Center and the city of Arnhem.**

### Program

The theme sustainable public transport will be explained by (International) speakers from science, business and (International) politics. Speakers include:

- **Prof. Dr. Ing. Adolf Müller-Hellmann**  
Rheinisch-Westfälische Technische Hochschule
- **Mr Arie Bleijenberg MSc**  
author 'New mobility – after the car age'
- **Mr David Sorg**  
Projectleader Market Development, VBZ Public Transport Zürich

### With engaging examples of among others:

- OV-Bureau Groningen
- HyMove
- Vossloh-Kiepe

For the entire program and to sign up for free go to [vocsymposium.nl](https://vocsymposium.nl)

**Date** wedn. 5 October, from 12 noon till 6.00 p.m.  
**Location** Industriepark Kleefse Waard  
Westervoortsedijk 73, Arnhem  
**Acces** free sign up via [vocsymposium.nl](https://vocsymposium.nl)

### Purpose and target audience

The approach is knowledge sharing, where developments that are currently taking place in the field of electric bus and train transport are at the heart. In addition, it offers a good opportunity to meet colleagues. During the symposium we want as much as possible to connect science, practice and the role local, regional and (inter) national politics can play in this field. The annual symposium is not only meant for politicians/executive board members and policy advisors, but also for knowledge institutions and industry both from home and abroad.
